**From** Reality Capture Software Product Management

## Contents

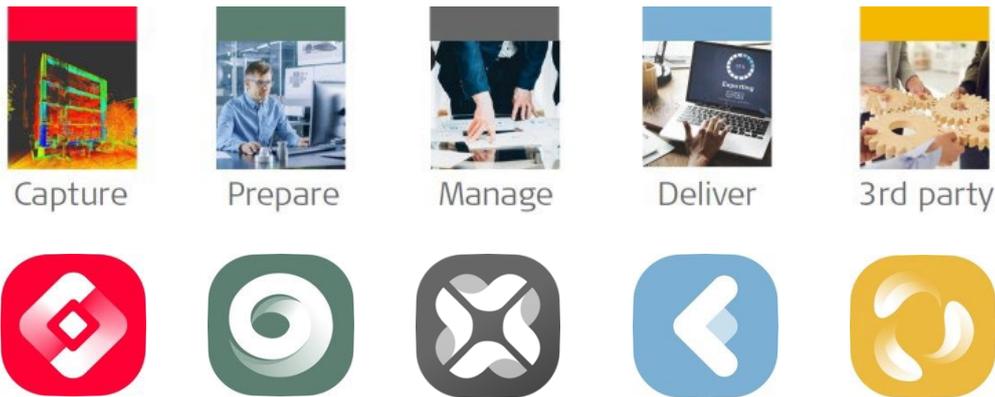

<b>What's New</b> .....	<b>2</b>
New Product Graphics .....	2
Windows 11 Support.....	2
CLM 2.5 Support.....	2

## What's New

Cyclone FIELDWORX 2022.0.1 is a minor release. This release includes new product graphics, support for Windows 11 and CLM version 2.5. All users with currently valid CCP, or with CCP valid as of 1 January 2022, can run the latest version with no new license required.

### New Product Graphics

Across the Leica Geosystems Reality Capture software portfolio, you will find new product graphics which improve the product's identifiableness on the user's desktop and taskbar and speak to their position within the field-to-finished workflow.

Each product is identified within its family by an acronym of two to four characters. The new graphics will appear within the desktop products, installers, web pages, product collateral and more.

### Windows 11 Support

Cyclone FIELDWORX now supports the Windows 11 operating system.

### CLM 2.5 Support

Cyclone FIELDWORX officially supports CLM 2.5.2.1. The installer includes the new version of CLM.

---

***This release of Cyclone FIELDWORX requires CLM 2.5 or newer***
